AICTE – EDUSKILLS VIRTUAL INTERNSHIP

Siemens Data Science Master

An 8-Week Professional Internship Presentation Report

INTERNSHIP DURATION

June 2026 – August 2026 (8 Weeks)

CANDIDATE CREDENTIALS

PRAJJWAL SINGH

Roll No: 2410031316

B.Tech (CSE) | Batch 2024-28

GRADE

O — Outstanding

Candidate & Program Overview

Candidate Details

Student Name

PRAJJWAL SINGH

Roll Number

2410031316

Degree

B.Tech (Computer Science & Engineering)

Academic Batch

2024-28

University

IILM University, Greater Noida, U.P.

Internship Profile

Program Name

AICTE – EduSkills Virtual Internship

Specialization Domain

Siemens Data Science Master

Duration

8 Weeks (June 2026 – August 2026)

Certificate ID

402ba7d147034138cc08

Offer Letter Ref

C17Y2026M081499400

Organization Profile: EduSkills Academy

EduSkills Academy is an ISO 9001:2015 and ISO 20000-1:2018 certified organization operating under the vision of "Nation Building Through Skills".

AICTE Collaboration

Operates under the patronage of the AICTE National Internship Portal, Ministry of Education, to empower engineering talent across India.

Industry Alignment

Partners with Siemens Industry Software to bridge the gap between academic learning and real-world data science practice.

Core Focus Domains

Data Engineering, Machine Learning, Data Preparation & Automation, and Enterprise Platform Administration.

Quality Assurance

Recognized as a Great Place to Work; structured, assessment-driven curriculum with certified learning outcomes.

Problem Statement & Industry Context

The Industry Challenge

While academic curricula extensively cover the theory of statistics and machine learning, students often lack hands-on exposure to the complete, real-world data science workflow used in the industry.

A high-performing model built in isolation provides little business value until it is grounded in a real use case, fed by clean engineered data, and properly deployed, monitored, and administered on an enterprise platform.

The Solution Scope

This internship addresses the complete data science lifecycle: identifying suitable business problems, engineering and preparing data, building machine learning models, and deploying, monitoring, and administering them at scale.

Learners master an industry-grade platform — RapidMiner AI Hub — to transform raw business data into reliable, monitored, production-ready machine learning solutions.

Core Project Objectives

Business & Use-Case Framing

Identify business problems suitable for AI and machine learning solutions before writing any code.

Data Engineering & Prep

Access, load, transform, and calculate data; master advanced data handling and automation.

Machine Learning Mastery

Build foundational and then advanced machine learning models across professional and master levels.

Deployment & Platform Admin

Deploy and monitor ML models, and configure/manage RapidMiner AI Hub at enterprise level.

Technologies & Data Science Toolchain

Data Engineering

- Data access, loading & transformation
- Data calculation & cleaning
- Advanced automation workflows

Machine Learning

- Foundational ML model building
- Advanced ML techniques (Master level)
- Model evaluation & refinement

Deployment & Monitoring

- Model deployment for business use cases
- Performance monitoring
- Applications & use-case management

Platform Administration

- RapidMiner AI Hub configuration
- Enterprise-level operations
- Platform governance & management

Data Science Workflow — Layered Approach

Business Understanding Layer

Identifying business problems suitable for AI and machine learning.

Data Engineering Layer

Accessing, loading, transforming, and calculating raw data.

Modelling Layer

Building foundational, then advanced, machine learning models.

Data Preparation & Automation Layer

Advanced data handling, cleaning, and automated workflows.

Deployment & Monitoring Layer

Deploying trained models and monitoring their performance.

Platform Administration Layer

Configuring and managing RapidMiner AI Hub at enterprise level.

Curriculum Timeline (Weeks 1 to 4)

Curriculum Timeline (Weeks 5 to 8)

Key Learnings & Demonstrated Skills

Business Use-Case Identification

Learned to evaluate business problems and determine where AI/ML delivers real value.

Machine Learning Model Building

Developed foundational and advanced machine learning models across the curriculum.

Model Deployment & Monitoring

Deployed machine learning models and monitored their performance in use.

Data Engineering Pipelines

Built practical skills in accessing, loading, transforming, and calculating raw datasets.

Advanced Data Prep & Automation

Mastered advanced data handling, cleaning, and automated processing workflows.

Enterprise Platform Administration

Configured and managed RapidMiner AI Hub at an enterprise operational level.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Internship Title	Siemens Data Science Master Virtual Internship
Issuing Organization	EduSkills Academy (ISO 9001:2015 & ISO 20000-1:2018 Certified)
Academic Patronage	AICTE National Internship Portal, Ministry of Education
Supported By	Siemens Industry Software (India) Pvt. Ltd.
Certificate ID	402ba7d147034138cc08 (Grade: O — Outstanding)
Offer Letter Ref	C17Y2026M081499400
AICTE Student ID	STU698c0da0f3a561770786208

Certificate of Virtual Internship

Thank You!
